

# January Student of the Month—Anndrea Marshall

---

Anndrea Marshall was chosen as January Student of the Month by the Stewart County High School (SCHS) faculty. This award was given in acknowledgement of her academic achievement, student involvement, and for serving as an exceptional role model for underclassmen. After high school, Marshall plans to major in biochemistry and minor in a foreign language or photography at Austin Peay State University or Western Kentucky University. Her ultimate goal is to work in forensics or in a research lab.

Academics are important to Marshall and she has consistently challenged herself through

honors, Advanced Placement, and dual enrollment courses. Her efforts have earned her a spot as a member of the Class of 2022 Top Ten Percent. Math teacher, Marcia Joiner, confirms Marshall's scholastic abilities saying, "Anndrea is a bright, hardworking, dedicated student who has excelled in my classes of Honors Algebra 2, Precalculus and dual enrollment math. I have thoroughly enjoyed teaching Anndrea since her sophomore year and have had the privilege of seeing her grow and mature in her mathematical abilities."

Marshall is a four-year member of SCHS Student Council currently serving as a class representative for a third year and previously as Vice President for one year. She is a four-year member of HOSA Future Health Professionals, a three-year member of Family, Careers, and Community Leaders of America, a three-year member of the Building Every Asset Right from the Start (BEARS) Team, a two-year member of Future Business Leaders of America and currently holds the position of Secretary, a member of the Spanish Club, and a member of Beta. She is a three year member of the Bonanza Yearbook Staff and is an Editor.

Her character makes her a positive force at SCHS. Science teacher Jessica Crutcher remarks, "Anndrea is thoughtful in her interactions throughout Stewart County High School. She is a conscientious, hardworking student with a sweet and gentle spirit. She has always exceeded expectations with the quality of her work in our time together and it was a privilege to get to be part of her biology experience. She serves as a source of encouragement to her friends and classmates which I know will continue into her career."

When asked about her time at SCHS, Marshall stated, "My time as SCHS has prepared me for my future by helping me know how to plan and how to do everything I aspire to accomplish. I know that planning and having time management in college will make it easier for me to get into the flow of how things work there. Teachers have also given me advice on decision making for my college and career path. Mrs. Joiner, Coach Ralls, and Mrs. Lambert have all given me ideas on how college classes are different from high school and they have prepared me to make smart decisions. They have shown me that the people you need will always be there to help. I am prepared to take on college life. It has mainly prepared me by giving me life lessons and people to lean on for knowledge and understanding. I know how to reach out when needed and I feel that everything will work out in the future because of a strong high school background and good teachers."

Anndrea is the daughter of Stefan and Angie Marshall.
